

1. ROTABLE POOL PROGRAM (RPP)

RPP will place rotatable units at previously agreed upon locations to support your operation, allowing you to have critical units on hand every time you need them.

BENEFITS

- Monthly fee per flight hour per aircraft
- Reduced inventory ownership, administration and transportation costs
- Very low TAT
- Increase cash flow
- May generate cash if inventory on hand is sold
- Buy-Lease Back option available
- Expenses forecasting simplified

2. CONSIGNMENT PROGRAM (CP PRO)

CP Pro allows the customer to have the consigned parts and materials in its own warehouse(s), depending on the particular operational needs and requirements.

BENEFITS

- Zero lead time
- Reduced inventory ownership and administration costs
- Automatic stock replenishment
- Customer pays for the goods once they are used
- Price escalation warranty
- Consignment stock may

3. JUST IN TIME (JIT)

JIT is an inventory strategy implemented to improve the return on investment of a business by reducing in-process inventory and its associated costs.

BENEFITS

- Set up times are significantly reduced in the warehouse
- Employees with multiple skills are utilized more efficiently
- Increased emphasis on supplier relationships
- Supplies continue around the clock keeping workers productive and businesses focused on turnover
- Reduced inventory ownership and administration costs
- Reduced transportation costs and shipping consolidation

4. KITTING SERVICE PROGRAM (KSP)

KSP reduces your storage requirements, simplifies maintenance tasks and further reduces handling costs from sourcing, inspection and packaging, all while maintaining complete traceability.

BENEFITS

- Reduction of inventory
- Reducing wasted time & effort
- Improved quality and inventory control
- Eliminating duplicate tasks

Momentive's silicone products are indispensable for the assembly and operation of aircraft, spacecraft, and military platforms.

Advantages of using Silicones RTVs from Momentive:

- Long-term stability under various extreme temperatures (From --115°C (-175°F) to 260°C (500°F))
- Long-lasting flexibility, adhesion and sealing under extreme temperatures
- Deep curing in a wide range of temperature and humidity.
- Excellent electrical insulation performance, suitable for sensitive circuits.
- Excellent weather resistance that can be used in rugged applications.
- Able to withstand fuels and solvents
- Wide range of viscosity-from non-flowable paste to liquid. Can meet a wide range of application needs
- Available in a variety of colors that meet military and government regulations

One-Component, Room Temperature Cure Adhesives and Sealants

RTV 100 Series Ready-to-Use Adhesives Momentive's premier line of adhesive sealants

- Meets MIL-A-46106 specifications
- Available in both paste and flowable grades
- Primer less adhesion to many substrates

RTV 133 Flame Resistant Adhesives For applications requiring burn protection

- One-component adhesive
- High strength
- Primer less adhesion to many substrate
- Non-corrosive (alkoxy) cure
- UL94 V-0 component recognition

RTV 142 Paste Adhesives Used for electronic gasketing or vertical/ overhead applications

- Non-corrosive
- Low outgassing

RTV 157 and RTV 159 High Strength Paste Adhesives Acetoxy Cure, High Strength Adhesion

- RTV 157 and RTV 159 combine high strength and high temperature performance with an acetoxy cure.

RTV 160 Series Non Corrosive Adhesives

- Non-corrosive to sensitive metals
- Available in multiple viscosities
- UL component recognition

FRV 1106 and FRV 1109 Fluid Resistant Adhesive Sealants Fluid resistance to many liquids

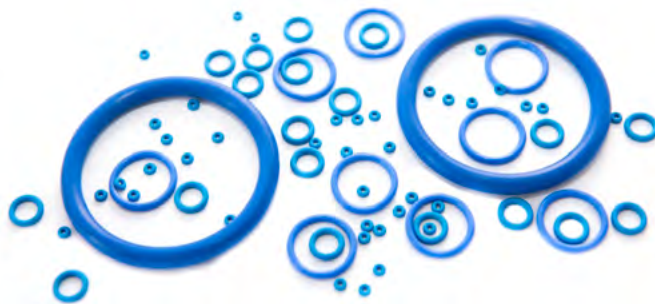

- For applications exposed to fuels, solvents, and chemicals
- Primer less adhesion
- Acetoxy, room temperature cure
- Weathering resistance
